

Together, You Can...

The Teamwork of Interdisciplinary Dentistry

A Two-Part Continuing Education Course Series
 For full course curriculum, speaker biographies, and information on accommodations for the program, visit www.TogetherYouCan.com.

Course Description:

The path to restoring a patient's esthetics and function is a challenge not to be taken on alone. Comprehensive, complex cases require the teamwork of skilled specialists and dentists working together like gears in a fine-tuned machine. By attending this course, the accomplished Interdisciplinary team of clinicians will provide you with the practical planning tools and techniques to diagnose and treatment plan the most challenging of cases. Together, you can achieve the ultimate goal of interdisciplinary dentistry with optimal patient outcome. In this two-part course series you will learn:

-  How to work as a team to diagnose and treat routine and complex cases
-  The tools to diagnose cases comprehensively and formulate appropriate global treatment plans
-  The role of the restorative dentist as quarterback of the restorative team
-  The role of specialists as skill players in the restorative team
-  The adjunctive procedures that specialists can do to improve treatment outcomes in comprehensive cases
-  The how CORE Template system can organize the diagnosis of complex cases
-  How social media can drive new and current patients to your practice

Who should attend:

General Dentists interested in guidance to lead an interdisciplinary team or Specialists interested in building a team with your referring dentists.
